## **Joys Digest #6**

September'19

Hello everyone, the Joys team is in touch.

After the release of Joys Wallet, we are actively engaged in connecting partner stores to our payment service and also working on the integration of our payment module into popular solutions in the retail market.

We will tell you about it in more detail, as well as about what we have managed to do over the past first month of autumn and what we plan to do in the future. Let's get started!

### **In this issue:**

- **Joys Digital: the first real purchase for BTC;**
- **Joys Wallet: integration of JOYS cryptocurrency and exchanging of digital financial assets to fiat funds;**
- **Joys payment module integrates into iiko, 1C and R-Keeper in October;**
- **Joys and Binance Jersey — we have opened a corporate account;**
- **Best cryptomemes of months.**

## Joys Digital:

the first real purchase in BTC

On September 9th, 2019, in the Joys Digital payment service the first real purchase with the use of digital financial assets was made. It happened in Kemerovo, in the **Green Gorillaz** fitness center. A monthly subscription was purchased using our Joys Wallet app. The buyer spent BTC, the fitness club received its estimated rubles. The uniqueness of this event is that it is the first industrial, scalable to any business solution that fully complies with the current legislation

of the Russian Federation. Now this service is available in all gyms of the network of Green Gorillaz fitness clubs.

We employ new merchants to the Joys Digital payment service, mostly in Moscow, including e-commerce. At the first stage, we plan to launch several dozen stores, conduct a series of tests and trials in the operating mode of the service, automate business processes, prepare marketing steps and several interesting solutions for the market.

## Joys Wallet:

integration of JOYS cryptocurrency and exchanging of digital financial assets to fiat funds

After the release of the Joys Wallet app in the **App Store** and **Google Play**, we began to work on expanding its functionality.

Earlier we wrote that at first time payments with using of Joys Wallet is possible only with BTC, and we will add other coins after the pilot operation. As you already know, the first real transaction was successful.

And now we are happy to announce that next month we will add the ability to pay for purchases using JOYS! This means that all the happy owners of our cryptocurrency will soon have the opportunity to purchase goods and/or services in any of our partner stores, which will become more and more every month.

In addition, in October we will add the ability to exchange digital financial assets between each other and also exchange them for fiat funds inside our app.

We are constantly working on the application and strive to make it a universal and modern way to pay for purchases in just a couple of touches of the screen of your smartphone.

## Joys payment module

integrates into iiko, 1C and R-Keeper  
in October

Our team has released an API that allows any partner to write a gateway that will allow you to accept Joys Digital payments.

API is public — it can be found **on our website**, if you have questions, we are ready to answer it and help to choose the best solution.

We test the payment module when it is ready.

In parallel with the development, we carry out the “packaging” of the payment module — we create advertising texts, user documentation that helps cashiers, and software documentation that helps technicians who accompany the point of sale.

Thus, by the time the payment module for a particular platform, such as 1C, we have not only the module itself as a software component, but also its accompanying auxiliary content.

Once the module is published and available for use, it goes to support — this means that we are responsible and support the operation.

Currently we are working with partners such as 1C RARUS and Karbis. The planned release of the publication of payment modules in October-early November.

Payment modules will be compatible with current solutions 1C, 1C Rarus current versions, and R-Keeper.

## Joys and Binance Jersey — we have opened a corporate account

In the **June digest**, we wrote about the meeting of CEO Joys Andrey Mikhaylishin and CCO Alexander Shamyán with a representative of the Binance cryptocurrency exchange in Russia and the CIS Gleb Kostarev.

The meeting was successful, and now we are happy to announce that the cooperation between Joys and Binance Jersey continues by opening an account on Binance Jersey. **Binance Jersey** has become our official partner for the exchange of digital financial assets, which will ensure the reliability of the service.
